# Introduction

---

This document lists the PC cards currently supported under Card Executive 2.0 for NT. Although many cards which have generic drivers will function correctly under Card Executive 2.0 for NT, this document lists the specific cards which have been tested to ensure they are supported under Card Executive 2.0 for NT.

This card list is preliminary and subject to change when additional cards are tested.

The following modes are indicated in this list.

<b>Mode</b>	<b>Description</b>
HS	Hot Swappable. Card can be inserted and removed at any time.
HI	Hot Insertion. Card can be inserted after boot, but can not be removed while NT is running.
PE	Point Enabled. A card can be inserted before the system is booted.
NT	Not Tested. The card belongs to a generic group of cards and should work with Card Executive because the card is in a generic class. When vendors provide these cards, Phoenix will test them.

The following comments apply to some of the cards listed here.

<b>Number</b>	<b>Description</b>
1	For hot swappable capability, use the driver Phoenix supplies with the software.
2	Use the supplied driver for the 3C575 portion of the card.
3	The card vendor is currently converting the driver to hot swappable capability. Contact the card vendor for details.
4	For hot swappable capability, obtain the driver from the card vendor.
5	Use the NE2000 driver Phoenix supplies with the software.
6	Use the ATA driver Phoenix supplies with the software.

## Hot-Swappable Cards
